### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher J. Cronin on 06/13/08. The application has been amended as follows:

The claim 52 has been amended as follows:

Claim 52 (currently amended): An apparatus which may be used for cooling a stream of gaseous fluid comprising:

- a) a mixing pipe through which said stream passes; b) at least one impact surface located inside said mixing pipe; c) a means for spraying liquid nitrogen into said mixing pipe, and
- d) an injection pipe for injecting said fluid into said mixing pipe, wherein said mixing pipe has a cross-section larger than that of impact surface and said spraying means, and
- e) a regulation loop for regulating the outlet temperature of said gaseous fluid leaving said cooling device to a preset temperature, said regulation loop comprising:
  - i) a means for measuring said outlet temperature;
  - ii) a means for adjusting the flow rate of nitrogen supplied to said spraying means, and
  - iii) an actuator, wherein said actuator receives a signal from said measuring means and actuates said adjusting means.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Claims 32 and 52 are allowable because prior art of record fails to disclose or suggest or teach the recited applying the diverted of the cooled fluid directly to the objects thereby cooling them (see claim 32); regulating loop regulating the outlet temperature of the gaseous fluid leaving the cooling device to a preset temperature; a means for measuring the outlet temperature ; a means for adjusting the flow rate of nitrogen supplied to the spraying means, and an actuator, wherein the actuator receives a signal from the measuring means an actuates the adjusting means (see claim 52). The closest prior art of record US Patent 5,036,673 to Miller et al. reads the claims except as mentioned above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MOHAMMAD M. ALI whose telephone number is (571)272-4806. The examiner can normally be reached on maxiflex.

Art Unit: 3744

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl J. Tyler can be reached on 571-272-4808. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
